

**As Readers and Writers,** we will explore stories, sounds, words, and pictures, and use them to express our ideas linked to our topic of seasons and weather.

**As Scientists,** we will explore the changes of the four seasons and the changeable weather that we experience with this through sensory play. We will continue to use the school's nature trail to support our understanding.

# Curiosity Cove

## Summer Curriculum Letter

**As Mathematicians,** we will continue to explore number, shape, space, and measure through games, play, puzzles, counting, building, exploring, and songs.

**As Sensory Explorers,** we will use our senses to discover what the weather is doing each day whilst expressing our preferences.

**As Communicators,** we will continue to broaden our core words to help us express ourselves and interact confidently. We use a total communication approach, incorporating signing, symbols, eye gaze, speech, gesture, and visuals, so that everyone can communicate.

**As Creators,** we will explore different materials, tools, and ideas to make our own unique creations based around nature and continue to develop our mark-making skills.
